

As part of the **BMFTR-funded project**  
**"Serious Games for AI and Privacy Literacy in Schools (SKILL)"**,  
the **Center for Critical Computational Studies (C³S)** at Goethe University Frankfurt am Main

we are looking for

## Student Assistant (m/f/d)(80 hrs/month)

position.

The position is **initially limited to one year**, with the option of extension. We expressly want longer-term employment.

### Area of responsibility:

- Support in the design and implementation of interactive teaching and learning materials
- Research work for scientific publications and project reports
- Support in the preparation and follow-up of workshops, privacy literacy and machine learning in school and extracurricular contexts

### Employment requirements:

- Basic knowledge of working with digital tools (e.g. collaborative platforms, simple web technologies, content management systems)
- Basic knowledge of media design and production (e.g. in the use of the Adobe Creative Suite or comparable creative applications)
- Good knowledge of German and/or English required; Willingness to acquire the language skills that are missing in each case

### In addition, the following criteria are desirable:

- First experiences with research methods of qualitative social research
- Experience with academic reference management (e.g. Zotero)

Please send your application together with the usual documents (short cover letter, CV, certificate of enrollment) by e-mail to Prof. Dr. Dan Verständig ([verstaendig@c3s.uni-frankfurt.de](mailto:verstaendig@c3s.uni-frankfurt.de))  
Subject: SKILL\_SHK). We ask you to summarize your application documents in one PDF document, which should not exceed the size of 5 MB.
